

Job Description | Production Artist

Chase Design Group is currently seeking a versatile, organized and talented individual to join the Bristol office. As part of the Chase team, this candidate will handle artwork adaptation, mechanical production, photo retouching/manipulation, and pre-press tasks such as:

- Adapting established packaging design to new sizes or variants
- Photo retouching, image manipulation, and product renders
- Working with design to choose and standardize inks and color builds for printing
- Obtaining, understanding, and implementing print/production specifications for each job
- Building final mechanical files for internal review and release to vendors
- Verifying accuracy of copy, regulated package elements, and legal mandates
- Attending pre-production meetings both internally and externally with the client and vendors
- Ensuring integrity of design intent throughout the production process

Production Artist duties focus on supporting the design team in the course of their client-related tasks. In this capacity the candidate will be expected to learn the specifics of our clients and our business and take direction regarding design intent from the design team and contribute technical and production related expertise. Specific areas of responsibility include:

- Excellent organizational skills and an eye for detail
- Organizing and maintaining production files and master art as needed
- Proofreading and quality control review

Our ideal candidate will be a proactive, hands-on individual with 2 or more years experience doing packaging production in a fast-paced team environment. Proficiency in the latest version Adobe Creative Suite a must, with a strong emphasis in Adobe Illustrator. Strong written and verbal communication, organization, and a understanding of print process and technology is essential. The environment is fast and the learning curve is often steep.

Chase Design Group is a strategically driven creative agency with offices in Los Angeles, New York and the UK. Each member of the Chase team is polytropic and able to perform multiple functions when required. This versatility allows us to take on diverse projects that challenge us creatively and keep our work exciting.
